

Learning Management System – CheckPoint

business
development
tools

The Product

CheckPoint is an advanced Learning Management System which allows managers and training administrators to set up and control the delivery of training. For learners, CheckPoint facilitates their use of the courses whilst remaining unobtrusive in their individual learning process. With easy-to-use features and a simple-to-navigate user interface, CheckPoint provides learners a quick and uncomplicated gateway to their portfolio of learning. CheckPoint can be used at 3 different levels and therefore provides different functionality for learners, managers and training administrators.

Product Features

- **Centralised administration and tracking facility:** allows trainers to monitor and assess student performance and course usage
- **Easy-to-use interface:** allows trainers to control access to courses and allocate security privileges.
- **Ability to group and report on users**

For learners

- **My courses tab:** provides access for the learner to all the courses assigned to them
- **My settings tab:** enables learners to change their own personal settings
- **My progress tab:** ensures learners can track their individual progress against all the courses

For managers

- **Manage Users:** Learners can be separated into groups such as branches or departments to directly reflect an organisations corporate structure. Courses can be assigned to specific learners and groups
- **Reports:** Four full-featured reports can be created. The journal report shows time on sections, score and status. The user report and company reports split the information down by user and division or department respectively. Test results and strengths and weaknesses in knowledge can be accessed from the Testing report
- **Certificates:** can be awarded for participation and completion of courses.
- **Usage Chart:** Recent usage of courses can be checked at a glance for managers

For training administrators

- **Manage Courses:** gives administrators the functionality to upload new AICC courses, change product descriptions and assign courses to specific groups
- **System settings:** gives administrators rights to change how users log in, set pass marks, print out certificates and update licenses

Who will benefit?

- **CheckPoint for the Learner** - Designed with all aspects of elearning in mind CheckPoint provides a simple way for learners to launch courses and track their own progress as they learn, facilitating access to courses how, when and where they want it.
- **CheckPoint for the Manager** - In addition to the standard features for Learners their manager is able to set up groups, generate reports and check recent usage.
- **CheckPoint for the Administrator** - Administrators can access the full range of functionality available to both the learners and managers and have more control over the systems settings with the options to import new courses.

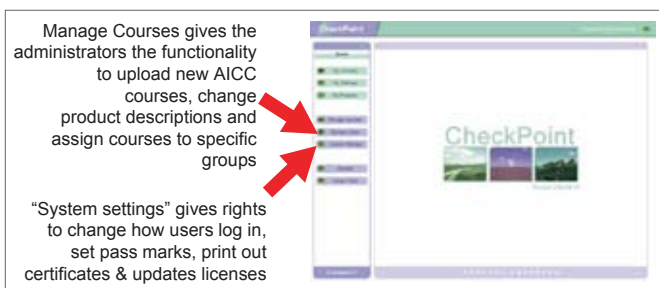

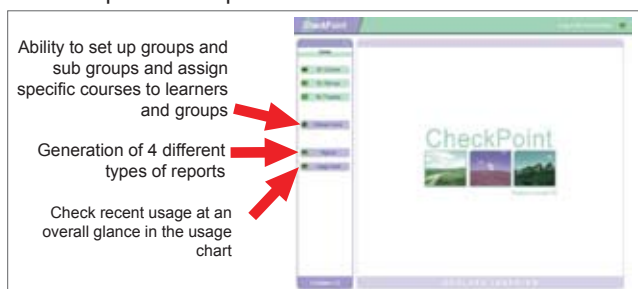

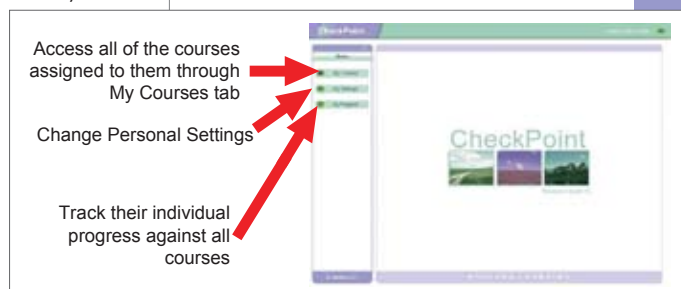

Want to manage your elearning?

- Track and control learners progress with a seamless Learning Management System
- LMS is unobtrusive to learners enabling them to concentrate on meeting their personal development needs
- Delivers full-featured progress reports including time online, test results, and strengths and weaknesses in knowledge
- Respond to emerging new learning needs
- System can be used with all AICC-compatible courses as well as seamlessly integrating with the Jenison suite of IT and management development courseware.

Technical Specifications

CheckPoint Learning Management System can be used with all AICC compatible courseware.

- Platform: Windows XP professional - preferably Windows 2000 or 2003 (Enable CGIs)
- Web Server: Apache is installed by default - preferably IIS
- CheckPoint requires 30Mb HDD free space
- Server Hardware Spec:
 - * Pentium II 1Ghz CPU * 1Gb Ram * CD-Rom drive (to install from)
- CheckPoint uses an Access datastore by default (there is no need to purchase the MS Access Database Management System). If CP2 is to be accessed by a large volume of users it is recommended that MS Sql 2000 is used.
- Internet Explorer 5.5 and above.
- JavaScript enabled.
- 5Gb HDD space for all courseware.

Developing potential
Jenison are publishers of quality
elearning solutions providing
content, authoring,
and management tools to
enhance productivity and effectiveness
